Hideez Service

Partnership Overview

Hideez Authentication Service is a passwordless IAM solution that revolutionizes identity management and access control. It offers organizations of all sizes the ability to eliminate passwords, enhance security, and provide users with flexible and secure authentication tools.

We create a partner ecosystem to unite professionals passionate about mastering identity and authentication.

Our partners help organizations around the globe to mitigate human errors in authentication process by leveraging Hideez Service along with our care and commitment to customer success.

Partner Program Benefits

Hideez Partner Program is a great opportunity for MSPs to expand their network of trusted security services with a new value-adding technology of the all-in-one solution that covers: Passwordless Login, SSO, 2FA, PC Automated Logon/Logoff and many more added features.

What's included:

- Dedicated Partner Account Manager
- Pre-Sales Support and Proof of Concept
- Free Pilot for Enterprise Customers
- Up to 50% Partner's Margin
- Free Integration with Active Directory, Azure AD, and Existing IAM solutions

Benefits of Hideez Service:

Implementing passwordless authentication saves companies time and costs, leads to increased workforce productivity and a significant reduction in the risks of cyber attacks

Multiple authentication options and a centralized user management tool ensure convenient and secure authentication for all employees

A free mobile app enables employees to conveniently log in to their accounts and unlock PCs with their smartphones, while hardware keys add extra functionality for maximum security
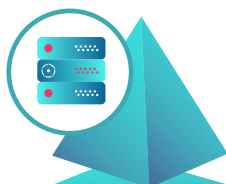

The solution can be deployed on-premises or in the cloud, providing scalability and adaptability to different environments

Layers of Security

1. Hideez Server

Easy and convenient way to manage users, workstations, and authentication methods

2. Hideez Keys

Hardware security keys for privileged users

3. Other Authenticators

Mobile app, Passkeys, or Platform Authenticators for non-privileged users

Hideez Service solves the following issues:

- User authentication
- Authorization enforcement, including contextual and adaptive access
- SSO and session management
- Compliance with security standards
- BYOI

- User administration functions
- Logging and reporting
- SaaS application enablement
- Legacy web application enablement
- Enablement for customers' applications and APIs, as well as IoT

Partners are earning up to 50% Margin from revenue with Hideez*.

*This must include sales and implementation.
